

## **Individual Accountability Report**

Student Name: Mustafa Al-Obaidi

Student Id: 1067533

Associated Team Deliverable: Sprint 3

Section: 1, Team: 6

### **What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable?**

During this sprint, each member of the team had different user stories to complete, but it seems that all of the team members are still new to Android Studio so the main challenge was applying the things we read and learn through documentations or any other online sources on Android Studio.

### **What was your existing level of experience with these topics/skills before your team began?**

Before we started this sprint I had no previous knowledge in using the firebase to reset the users passwords, that required some research, and reading through the firebase documentations.

### **Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?**

After completing this sprint, I feel more comfortable and more confident in using the firebase as a cloud service. I learned how to reset the password for the user using the firebase cloud service.

### **What specific contributions did you make to this team deliverable? This should include technical or project management contributions.**

In this team deliverable, my task was to allow the user to reset their password so they don't lose access to their account in case they forget their password. Some research was required in order to learn what libraries I need to use and what source of code will work on the Android Studio.

### **With whom did you collaborate for any of the above contributions (be specific)?**

Even though I completed the user story assigned to me individually, At the end of the sprint, me and the other team members worked together to ensure we provided a good presentation. That included doing a demo and agreeing on how are we going to present our work.

**Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable)?**

I was able to finish the user story assigned to me in four days, which is about eleven days before the due date. Testing documentation was provided, and the user story was marked closed.
